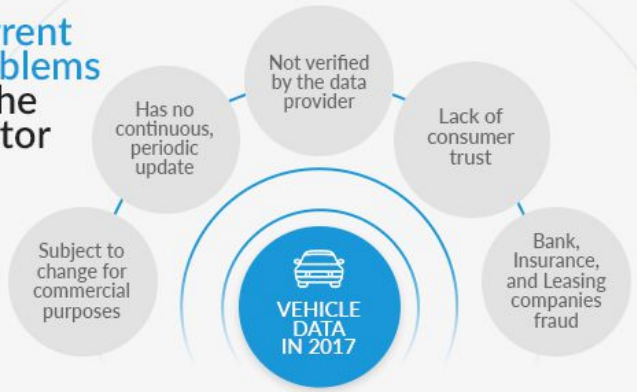
VINCHAIN

THE WHOLE TRUTH ABOUT THE VEHICLE HISTORY ON BLOCKCHAIN

Current Problems in the Sector



Meet the Solution! - the VINchain Blockchain

How This Data Will Be Useful

VINchain API
We will provide API access to our database which will make interacting with the system easy and convenient for other businesses

VINchain App
The VinChain app pairs with an IoT device and unlocks a whole new world of possibilities! You will be able to save money, get discounts, and see diagnostics of your vehicle

VINchain Sourced Reports
Alpha version is life!

Our partners will be able to sell VinChain verified reports to their customers, or supplement their own information

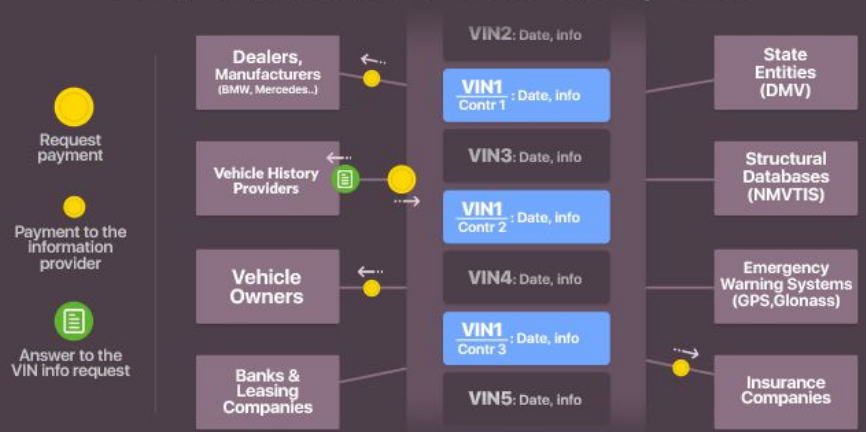
VINchain History Reports
Alpha version is life!

A customer will be able to come to VinChain to obtain a report that contains the full truth of the vehicle's history

VINchain Blockchain
With the help of blockchain technology we will create a decentralized and transparent database

Big Data Analytics
The statistical information collected by VINchain will be used for big data analytics for large enterprises such as insurance companies

How tokens are used in the system



Each participant in the network can request data with the aid of tokens. The paid tokens are distributed to the information providers in proportion to the amount and value of the information that they provided. A complete report is formulated and returned to the payer.

Road Map

February 2017
Concept development
BEGINNING

October 2017
White paper and project concept approval

November 23, 2017
Token Pre-ICO for early-stage investors

December 1, 2017
VINchain Token Pre-ICO

December 24, 2017
End of VINchain Token Pre-ICO

2018

January 2018 - April 2018
Development of MVP

January 2018
Alpha version of the VINchain app

January 29, 2018
VINchain ICO Presale

February 1, 2018
VINchain ICO Begins

February 2018
Alpha version of the VINchain app

March 2018
MVP testing

April 15, 2018
End of VINchain ICO
In 4 to 6 weeks tokens will be listed on exchanges

March, 2018
VINchain Blockchain Development

April 16-23, 2018
Tokens distribution

May, 2018
Alpha version of the VINchain Blockchain

July, 2018
Beta version of VINchain Blockchain, VINchain API, Vinchain App, VINchain report

3rd Quarter of 2018
Spreading among USA, generating first revenue

4th Quarter of 2018
Spreading among Europe

January, 2019
VINchain big data analytics for enterprises

January, 2019
Development continues in all directions

VINchain App

In addition to the flexible API, during the process of development, a mobile application and a website will be created for dealers, insurance companies, and manufacturers

Benefits of the App

Save up to 30% on your insurance policy

Until now, insurance quotes have been measured against a set of static metrics, like age, gender and location. Some drivers end up paying more than they should to make up for other, less careful drivers.

Lower Premiums

VINchain assesses how you drive and with your permission can provide this information to your insurance company. They will in return create a policy that is unique to you and based on your actual driving, and not on generalized statistics.

Pay As You Drive

Many insurance companies offer special 'pay as you drive' programs as a reward for good drivers

Improved Driving

VINchain will collect statistics on your driving style and will provide you with tips how to improve your skills, lower gas consumption, minimize maintenance costs, and lower your policy premium

The Application will allow you to get the best offers for car maintenance, discounts on service, refueling, washing, finding a car on a huge parking lot, and even remotely controlling it!

The Application will also collect statistics pertaining to your driving style, tell you how to drive more economically, and even offer discounts on insurance premiums!

Keeping all of this collected information on the blockchain will confirm its reliability and allow the owners to increase the value of their car at the time of sale!

Get paid for your data

For adding the data to our database you will be rewarded with Vinchain tokens which you can use as a payment for different services.

Sell on Exchanges

Pay for Services

Get Discounts From Our Partners

Why VINchain is the leader

Insightful Data Sets

VINchain will collect data from all possible sources, including diagnostic and contextual data

Strongest Cloud Ecosystem

You will have all the data stored in our system so our partners will be able to provide you with offers in advance

Hardware and Carrier Agnostic

VINchain covers the majority of the vehicels with aftermarket hardware and software solutions

Powered by the Blockchain

All of the information about your vehicle will be stored in our blockchain with the help of the mobile app

Token Sale

1st February 2018
