

REVOLUTIONARY WAY TO PAY WITH CRYPTO

What is FuzeX Project?

With FuzeX card, wallet, and token as an available payment token within the FuzeX payment ecosystem, our project will ease your cryptocurrency management and enable actual use in the real world.

- FuzeX Token (FXT)
 - ERC20 Based
 - Total Number : 1,087,156,610 FXT
 - Current Volume : 729,298,443 FXT

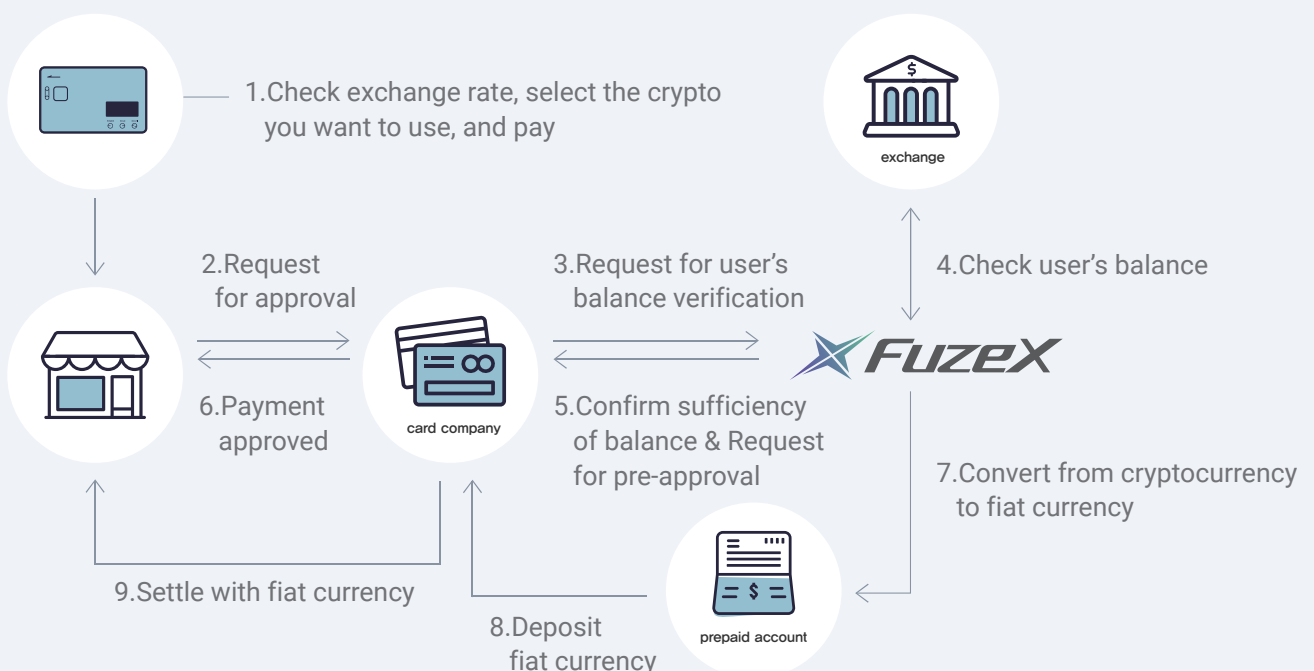

- FuzeX Wallet (Management App)
 - Create & manage accounts
 - Check real-time exchange rate and transaction history
 - Supports 2FA security measures
 - Add & manage payment cards
 - Track location of the card if lost, misplaced or stolen

- FuzeX Card (Payment card)
 - Choose & manage the cryptocurrency you want to use
 - Check balance & real time exchange rate
 - Supports 2FA security measures
 - Hold various type of cards: Credit/Debit/Prepaid card
 - Store membership cards: QR code, Barcode

Pay via Existing Payment Infrastructure, Just Like a Regular Debit Card

Payment with FuzeX card will be implemented by using the existing legacy payment network just like a regular debit card that we daily use. On the surface, neither the cardholder nor the merchant will notice any difference.

FuzeX Platform Creates FXT Token Economy

FXT used for purchasing FuzeX card

FYI, purchasing with Partners' token is also under consideration

FXT as a basic coin for payment

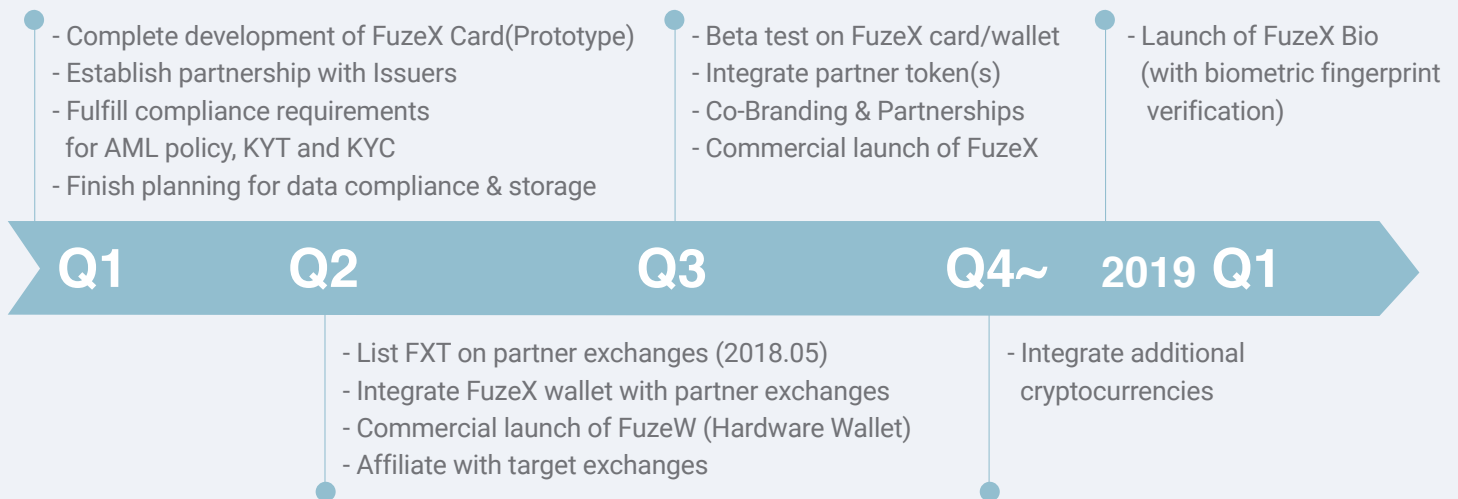

BTC, ETH and FXT will be supported and users will receive additional discount when paying the exchange fee by using FXT

FXT-retention based benefits

various advantages for FXT users, such as increase in daily usage limit and reduction in ATM withdrawal fee

FuzeX Considers "TRUST" as the Top Priority.

FuzeX team is trying its best to keep up with the schedule in roadmap. Prototype Development → ICO → Partnership with Issuers → Listing on Exchanges → Commercial Launch
