

ADHIVE

THE FIRST
AI-CONTROLLED PLATFORM
FOR INFLUENCER
MARKETING

TOKEN SALE START DATES
PRESALE – 30 JANUARY 2018
PHASE 1 – 28 FEBRUARY 2018

WHAT IS ADHIVE?

AdHive is the world's first AI-controlled Influencer Marketing platform. Our service offers a fully automated, blockchain-based solution for mass placement of native video ads on influencers' channels.

The **core mission** of AdHive is to bring together advertisers and influencer communities in order to shift large advertising budgets from TV to the digital video industry.

AI modules and blockchain technology make this platform a place where bloggers and influencers combine to form one giant virtual TV channel with powerful targeting mechanics and high audience engagement, the likes of which are unachievable in the TV advertising market.

WHAT PROBLEMS DOES ADHIVE SOLVE?

At the moment, despite the ever-increasing interest in influencer marketing, an adequate and transparent system of interaction between market participants has not yet been formed. Advertisers and bloggers are constantly faced with numerous cases of inefficiency:

PROBLEM SOLUTIONS

Lack of transparency and reliability

Our platform provides fully automated interaction between market participants, excluding intermediary agencies with unreasonably high commissions from the chain.

Moreover, our smart contract technology makes it possible to avoid fraud and establishes a clear framework for market interaction, without the need to enter into numerous legal agreements.

Inaccurate metrics and tools for control

As a powerful analytical tool, our platform provides users with access to real-time statistical data at all stages of the advertising campaign.

Thus, advertisers are able to precisely target advertising campaigns, set prices and calculate ROI. The AI and community ensure proper execution of assigned tasks.

Overall market complexity

AdHive is highly interested in improving overall market availability and competition level by means of time- and cost- efficient campaigns available at the global level. Our automated solution will open the influencer advertising market to small and medium-sized businesses around the globe, as well as to novice influencers, who are often more effective than top influencers.

HOW DOES ADHIVE WORK?

AdHive creates an easy way to launch massive international advertising campaigns on influencers' channels. Our service automates all steps of interaction with influencers. Advertisers just need to set up a campaign and place the necessary budget. The platform will choose relevant influencers, propose tasks and conditions, confirm acceptance of terms, ensure proper placement using AI and community approval and release payment via smart contract when the task is complete.

ADHIVE

AdHive's AI modules for video and speech recognition are already implemented by real businesses

YOU CAN ALREADY TRY OUT THE ALPHA-VERSION OF THE PLATFORM

A Smart TV operator uses our modules for determination of product placement to show overlay ads with 97+% accuracy

A Global FMCG brand monitors 100+ bloggers YouTube channels to find key words and objects

ADHIVE TOKEN

AdHive Token (ADH, Ethereum ERC20 token) - is a native cryptographic project token, which gives participants the right to access multiple activities and services of the AdHive platform.
