

Brand new method via ERC tokens to connect people in the world.

New DappSNS "RoundTable"

Beta Release in June-2018

Using Ethereum address authorization method enables "RoundTable" to create dedicated community where only holders of specific ERC token can participate.

By applying the characteristics of unmodifiable block chains, you can form a fan community only for specific token holdres, issue tickets that are un-resaleable and so on.

Compliant to multiple platforms

Android

iPhone/iPad

Browser

"Round Table" for browsers which supports Chrome / DApp browsers (Trust Wallet, Cipher etc.) will be released first.

"RoundTable" to change our future

Creating special communities which are accessible only for specific token holders.

Issuing non resaleable tickets with ERC721 technology.

Fan community that is accessible only for special events participants.

Functions using ERC721 technology will be sequentially implemented after official release.
