X8 CURRENCY

A stable coin for the future, providing liquidity today

X8 AG
21 Bahnofstrasse,
6300 Zug,
Switzerland
www.x8currency.com

At X8 currency, we have been working relentlessly behind the scenes to ensure that our risk management artificial intelligence software (AI) and hedging solutions are the best in class. Our software has been developed over 10 years and was initially used for the FinTech industry. As an outcome the X8 cryptocurrency is now one of the most stable digital currencies in the industry.

X8 prioritises wealth preservation, coupled with providing our investors with high levels of liquidity. X8

currency consists of non-leveraged reserves in the top 8 fiat currencies and gold providing unparalleled safety for investors and a liquid asset to hold in your portfolio. At X8, we believe that diversification remains a key facet required to avoid devaluation of the currency and hence the underlying basket has been selected in a prudent manner to avoid geographic and asset class concentrations.

X8 is proud to announce the inauguration of our wealth management solution for both

traditional and digital assets, through our holding company Alpine Asset Management AG, regulated by the Swiss Financial Market Supervisory Authority (FINMA); which is a testament to our approach to combatting financial and cyber crime risks such as money laundering, terrorist financing and sanctions.
