# INTRODUCTION

Digital currencies are disrupting the status quo of today's financial world. As new cryptocurrencies rapidly emerge, and older ones advance even further, we can explore more efficient ways to transact globally.

The proliferation of technology has made it possible to exchange information, make purchases, and trade globally from the comfort of our homes, and at the touch of a button. ALTTEX is at the forefront of the present digital currency exchange innovation, providing crypto traders with the tools they need to work more efficiently.

Cryptocurrencies have come a long way since 2009 since the first digital coin, Bitcoin, was launched. Now, there are numerous coins, and these coins offer some unique feature that satisfies a user's need.

**Statistics have clearly shown that, as the price of Bitcoin and other cryptocurrencies continue to soar year after year, cryptocurrency adoption is on the rise**

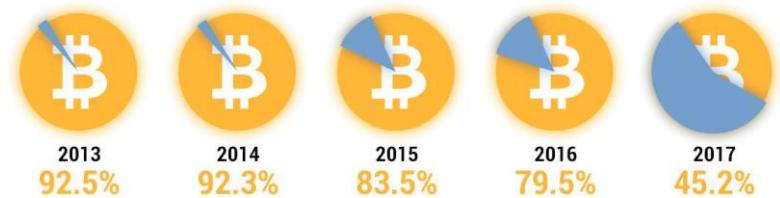

According to Statista.com, globally, there are over 21 million crypto-wallet users for the Blockchain alone. This is just a slice of one big pie. Also, the price of one unit of cryptocurrency has appreciated from \$200 in Q1 of 2015 to \$9,327 as of January 2018. There is a huge opportunity for contributors to increase their ROI, and improve their bottom lines, if they can successfully leverage cryptocurrency trading.

## THE EXPLOSION IN CRYPTOCURRENCIES

Over 300 new coins reached \$1mm market cap in 2017

Bitcoin Percentage of Total Market Cap

Apart from turning sheer profits, contributors can also benefit from the decentralized nature of cryptocurrencies to hedge against the rapid fluctuations of fiat or physical money prices (e.g. Dollars, Euros, and Pounds).

PURCHASE CRYPTOCURRENCY FROM ANY PART OF THE WORLD USING  
YOUR CREDIT OR DEBIT CARD

NETWORK WITH OTHER TRADERS WHILE MANAGING ALL OF YOUR  
CRYPTOCURRENCIES FROM ONE SECURE APPLICATION

# MISSION

MAKE PERFECT WHAT WAS BEFORE JUST GOOD

**OUR MISSION IS TO PERFECT WHAT WAS CONSIDERED GOOD**

Our mission with ALTTEX is to create a universal integrated platform to unify crypto traders all over the world, using one secure application for both communication and trading activities.

# VISION

**OUR GOAL IS TO CREATE A UNIQUE PLATFORM, WHICH COMBINES ADVANCED TECHNOLOGIES BASED ON BLOCKCHAIN, AND TOOLS FOR ATTRACTING AND PRESERVING CRYPTO ASSETS**

We believe that the future of finance is digital currency. Our aim at ALTTEX is to empower crypto traders with the tools they need to succeed. To achieve this, we are developing a mobile-based decentralized exchange that is secure, intuitive, functional, and, above all, user-friendly.

# HOW IT WORKS

## A DECENTRALIZED, MULTI-CURRENCY EXCHANGE PLATFORM BASED ON AN ADVANCED BLOCKCHAIN ARCHITECTURE

The basis for the ALTTEX platform is a decentralized network, where each user is part of Altex's blockchain. The full responsibility for carrying out the transaction is assigned to the ALTTEX network block, while, much like Bitcoin, all transactions reports are encrypted. To boost transaction speed, AltX tokens use the DPoS consensus algorithm.

This implies that participants transfer responsibility for verifying a particular transaction to selected delegates (nodes with the largest capital). This is the basis for achieving the maximum transaction speed. The voice that the candidate receives to become a miner is very flexible. It is easily assigned by fulfilling requirements, and can also be easily taken away in case of an error. Miners receive financial rewards for processing the transaction, so they are interested in making sure that reasonable transactions are included in the blocks.

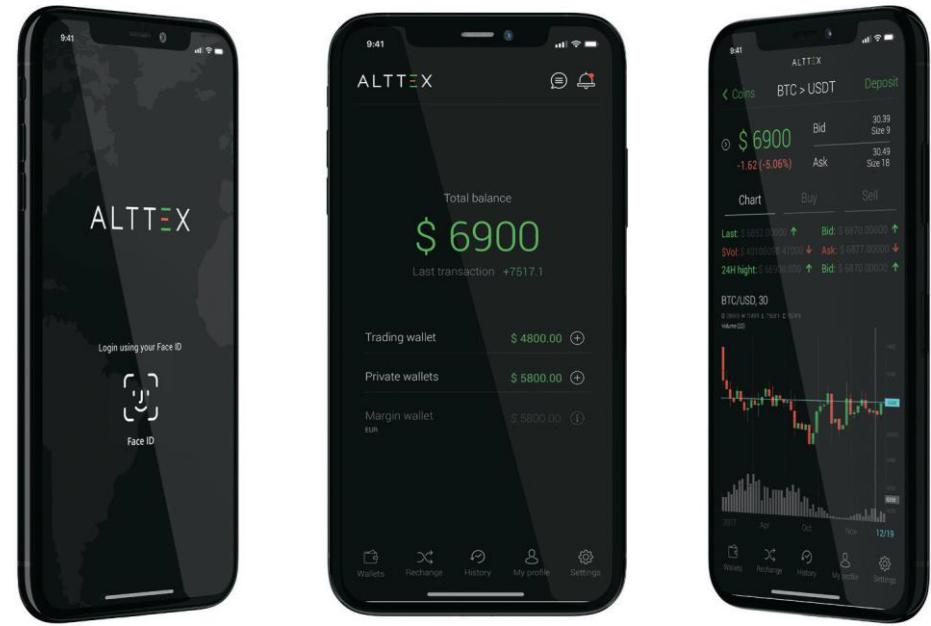

Alternatively, users can withdraw their votes. This will cause the particular miner to drop out of the list of block producers. Thus, for elected delegates, if the transaction block comes from a trusted delegate, there is no need to spend time verifying all network nodes. This scheme gives several unshakable advantages: improved speed development and excellent controllability. Also, to date, the DPoS network has never been successfully hacked.

# AltDEX

We identified a crypto trader's needs and built a solution around it. Most crypto traders need to manage multiple exchanges to access various cryptocurrencies. These exchanges are selected based on certain criteria:

- Simplicity of the user interface;
- Selection of currency pairs;
- How quickly tokens can be added; and
- Security of the exchange platform

To meet the needs of all traders, ALTTEX was developed to create a decentralized, multi-currency trading platform with top notch security protocols.

It is decentralized, which means that the system is secure, and prevents the exchange from hackers and DDoS-attacks.

AltExchange security system is quite reliable. For an extra level of protection, we have enabled Touch ID, Face ID, and Pin-code functionality with two-factor authentication via email.

Users can securely buy cryptocurrencies using a credit or debit card, and withdraw funds to it with minimum commission. All that is needed for identity verification is two selfies showing both sides of the card using our special AltScanner.

# AltMessenger

AltMessenger is a decentralized messenger powered by Blockchain technology. It has no central servers or information pool; thus, users are completely protected. In addition to its communication functions, it also allows you to purchase goods using crypto wallets, sell items, and receive cryptocurrency. The user interface is very simple and easy to use.

An added advantage of the crypto messenger is that it allows users to make voice calls from any part of the world at some of the lowest rates compared to our competitors.

The fee for voice calls is conveniently deducted from a user's crypto balance, which is customizable to every user.

Another great thing about AltMessenger is that when a user receives a voice call, they receive rewards in ALTTEXcryptocurrency, which they can use to purchase items, trade on the cryptocurrency exchange, transfer earned money to a bank card, buy applications or games, or simply continue to use them for voice calling.

# AltSafe

We understand that it is easy to make money, but much more difficult to keep it. We have created a system with customizable functions to help users save their cryptocurrencies. A user can specify a timeframe and the money will be inaccessible until the time has elapsed. This will eliminate the possibility of tampering saved funds.

AltSafe is an interactive, multi-currency wallet that displays real-time account balances using push notifications. It is a “Warm” wallet, which combines the advantages of Hot (Online) and Cold (Offline) wallets by allowing users to decide how much of their funds they want to keep in both.

# WHY CHOOSE ALTTEX?

ALTTEX offers crypto traders all the tools they need to succeed. We have the following unique advantages that sets us apart from other crypto exchange platforms:

Compatibility with All Major Mobile Devices

Simple to Use and Intuitive UI

Multifunctional and Enables Multitasking

Lowest Charges on Digital Currency Transactions

Decentralized Security Protocol

Best Usability of UX Applications

Blazing Fast Speed on Transaction Verification

Stringent Security to Ensure User Protection

Professional Support Service

Loads of Extra Features

At ALTTEX our objective is to piece together all the missing components of cryptocurrency exchange applications, and offer the best solutions for our users.

# ALTTEX TOKENS

Alttex Token (ALTX) is a utility token. This means that ALTTEX application will provide users with future access to its digital products or services. Future services include buying virtual goods through ALTTEX Crypto Messenger, providing a free-to-use decentralize exchange (AltDEX), and storing cryptocurrency using AltSafe.

ALTXs are sold during our ICO launch. After the deployment of the ALTTEX application, purchasers of ALTXs can infuse it back into the Altex ecosystem. ALTX uses the DPoS consensus algorithm, and will be recirculated back into the ecosystem following the successful launch of the full-fledged ALTTEX mobile application.

When performing buy-sell operations, ALTX will be used as a medium of exchange. It will act as an internal unit of account that can be used to upgrade users' application packages, purchase stickers, buy and sell goods, or exchange with other popular cryptocurrencies. ALTX can be used to purchase advertisement space within our applications as well.

ALTX will unlock a world of other potential opportunities.

**FOR THE STARTUP PHASE, 50,000,000 ALTX WILL BE RELEASED**

# ROADMAP

«DEVELOPMENT OF CRYPTO-EXCHANGE»: BEGAN CONCEPT DEVELOPMENT OF ALTEX, A DECENTRALIZED MOBILE PLATFORM APPLICATION.

«DEVELOPMENT OF THE CRYPTO-MESSENGER»: THE BASIC DEVELOPMENT OF THE INSTANT MESSENGER. ALTEX CONCEPT WAS CARRIED OUT

«SMART SAFE DEVELOPMENT»: CONCEPT DEVELOPMENT FOR A SAFE MOBILE STORAGE, ALTSAFE

«CREATION OF THE ALTEX CONSORTIUM»

«LAUNCH PRE-SALE»: PRE-SALE, PRIVATE PRE-SALE AND PUBLIC PRE-SALE

MARCH 2018

«ICO LAUNCH»

MAY 2018

«ISSUING ALTX TO CRYPTO EXCHANGES»

JUNE 2018

«ALT SAFE ANNOUNCEMENT»: BETA VERSION OF ALT  
SAFE

SEPTEMBER 2018

«ANNOUNCEMENT OF ALTEX  
CRYPTO-EXCHANGE»: BETA VERSION OF ALTEX  
EXCHANGE

JANUARY 2019

«STARTING ALT MESSENGER AND SMART SAFE»:  
LAUNCH OF A FULL-FLEDGED ALT MESSENGER AND  
ALTSAFE APPLICATION

# MEET THE TEAM

ALTTEX CONSORTIUM IS A CREATIVE AND PROFESSIONAL TEAM, SPECIALIZING IN DIFFERENT AREAS OF THE IT INDUSTRY

EVGENII MEITA

FOUNDER AND CEO

HIGHER EDUCATION IN ELECTRONIC ENGINEERING. 15 YEARS WORKING IN IT MARKETING AND E-COMMERCE.

OLEH SHPACH

CO FOUNDER

HIGHER EDUCATION IN THE FIELD OF NETWORKS AND IT SECURITY. 12 YEARS WORKING IN THE FIELD OF CREATING, PROMOTING, AND SELLING IT PRODUCTS.

ARIFOV ELDAR

CHIEF FINANCIAL OFFICER

HIGHER EDUCATION IN FINANCE AND AUDIT. 10 YEARS WORKING IN THE FINANCIAL SECTOR AND 2 YEARS WORKING IN THE FIELD OF BLOCKING AND CRYPTOGRAPHY.

ALINA LISOVA

CHIEF PUBLIC RELATIONS OFFICER

HIGHER EDUCATION IN THE FIELD OF PERSONNEL MANAGEMENT AND ECONOMICS. HAS 8 YEARS OF EXPERIENCE AS A PUBLIC RELATIONS SPECIALIST WITH STATE-OWNED ENTERPRISES.
