EXCALIBUR COIN

2018
WHITE PAPER

ABOUT EXCALIBUR COIN

Concerning Excalibur Coin

Excalibur Coin (also known as Exco) is the national cryptocurrency which goes between all creators and fans . Our world has been developing at an alarming speed owing to rapid innovations of Internet-based technologies.

The evolution has enabled us to express our own various data and ideas, outdating the conventional value-line from industries to individuals.

We are experiencing tremendous development in sending our individual messages via not a few online technologies, such as the Blog, YouTube, Twitter, Instagram, Pixiv, and etc.

We are facing the new generation of dispatching individual information.

However, it is also true that there are few creators who can funnel their energy into creational activities.

For instance, they cannot spend enough time for creation because they may face financial problems, and therefore, their top priority is their regular profitable business.

Some creators, even though they can devote themselves for their activities, cannot ensure the way of making public their ideas and projects.

Excalibur Coin is fully aware of supporting all these creators, saving splendid ideas from being abandoned because of unfortunate situations.

1. Going between creators

A splendid work of comic or music is sometimes brought by corroboration of different creators with different abilities.

We will bring together, in Exco Community, creators with various skills and provide them with chances and places to focus on their activities.

We are willing to create new values by connecting those who visit us.

This makes us possible for an author to play a part of screenwriter of comics or for an illustrator to play a part of 3D designer .

The possibilities of works expand infinitely through corroboration among creators, thanks to mutual stimulation of creative sensibilities would bring forth brand new ideas.

Exco help creators develop their special talent and expand their possibly infinitely.

2. Going between creators and their fans

We make supporting system for creators by establishing a fan-centered community

where gather creators who wish to devote themselves for creation and fans who wish to support creators and to appreciate their works

A usual "patron-site" requires fee for using systems.

Exco passes supporting investment from users to creators by 100%.

The expansion of activities of fans helps advertisements of creators.

We will establish a "Brock-chain system," which leads to the increase of the number of fans by making micro-influencers in various part of the country, This is one of examples; we will build stronger connection between creators and fans through our new measures to affording them new stimuli for creative activities.

A brand new work will appear then in a more perfect styles, inviting good many numbers of fans who wish to support creators all the more for it.

3. Connecting creators to industries

Surveys to industries shows that they hope to request the work to creators if they can secure them. In a near future, we will actively engage in establishing a good relationship between creators and industries.

ROAD MAP

How to acquire Excalibur coins and it's use

All fans can earn rewards through contributing articles about impressions concerning works of creators.

Our events are to be held three or more times a month.

The rewards can be used for purchase of goods or for supporting creators.

All creators can collect Excalibur Coins by joining the events or receiving donation from fans. Users can cash Excalibur Coins at the cryptocurrency exchanges.

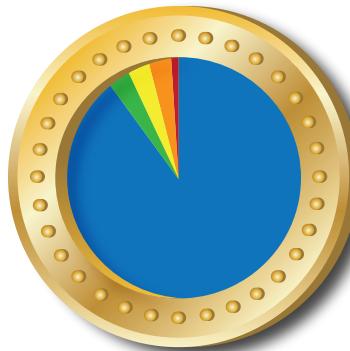

Not only through events held by our operating staff, but also through collaborated events with excellent companies, we plan to build the stable system in which donation by fans can directly reach the hands of creators, enabling their advertisement activities.

The standard of the coin and its use

Token name	: ExcaliburCoin
Token symbol	: EXC
Issue number	: One trillion

Percentage of token

- Creator support 90%
- Open sale 3%
- Development cost 3%
- Public information expenses 3%
- Management team holdings 1%

Excalibur coin is the cryptocurrency based on ERC223 standard. ERC20, the most adapted standard, does not allow the tokens to be paid back if it is sent to the wrong address. It is said that more than three hundred million tokens are sent to the wrong addresses by the end of 2017. ERC223, solving this serious problem, permits users to recover the tokens sent to a wrong address where the other party cannot receive them. Therefore, we assure that Excalibur coin is safely designed even for beginners.

Conclusion

We, the Excalibur Coin operating unit, hope for delivering brilliant works to the whole world. Individuals will have more chances to transmit their information.

To promote this individual chances, we have started the project of Exco. Don't you believe it exciting that your own inspired ideas such as game-characters, BGMs, or systems would play actual and important parts in the games, or the animations?

Isn't it fun to see your posed videos would become commercial films, or your own drawing pictures would be showcased?

We do our best in building systems which enables all participators, from creator to fans, to enliven the creating industries.

We hope to realize the world where fan's deep emotions will surely lead to the supporting activities for many potential creators.
